EDUCATION

University of Exeter

Exeter, UK

BSc (hons) Computer Science - Grade 2:1 - 69%

June 2025

- Dissertation: An **AI-powered trading platform** using reinforcement learning (PPO) for market prediction and real-time portfolio visualisation

Tanglin Trust School

Singapore

A Levels

June 2022

- Computer Science: A* | Mathematics: A* | Economics: A* | EPQ: A

PROFESSIONAL EXPERIENCE

Venaglass Haymarket Ltd

London

Junior Software Engineer

March 2026- Present

- Developing a Python-based AI agent to automate receptionist workflows (visitor check-ins, meeting room bookings, access control) through third-party API integrations.
- Owning end-to-end feature development, from requirements through to deployment, in a fast-paced startup environment.
- Collaborating directly with the CTO on system design and architecture decisions in a small engineering team.

BXR Advisory Partners LLP

London

Software Engineering Intern

November - December 2025

- Built an API-driven upload system enabling direct ingestion into accounting software, eliminating manual workflows and reducing processing time by 80+%.
- Designed a database of investment opportunities with a dashboard for deal comparison, tracking metrics across 15+ deals.

Investment Intern

September - November 2025

- Analysed early-stage and growth investment opportunities across private equity, venture capital, and real estate investments.
- Participated in 20+ client meetings and pitch calls, contributing to discussions on deal structure and value creation.

TECHNICAL PROJECTS (More on Github & portfolio)

[Market Brief Investing](#)

2026

- Developed and deployed a Swift iOS application for real-time financial data analysis, integrating external APIs to process and display live market data.
- Engineered backend data handling and caching strategies to reduce latency and ensure efficient real-time updates.
- Deployed the application to the Apple App Store, overseeing end-to-end release cycles, iterative updates, and performance optimisation based on user experience considerations.

[Microservice Voice Assistance \(Alexa\)](#)

2025

- Designed a microservices-based voice assistant using Flask, enabling scalable API-driven data retrieval
- Enabled voice querying of local weather and other data with scalable microservice architecture

OTHER EXPERIENCE AND LEADERSHIP

Tanglin Trust School

Singapore

Hackathon Judge

September 2024

- Assessed 15+ student-built apps based on code quality, feasibility, and innovation
- Collaborated with Heads of Department serving as co-judges to discuss evaluations, align scoring criteria, and select winning projects

TECHNICAL SKILLS

- **Languages:** Python (proficient), Java (intermediate), C (proficient), C++ (intermediate), SQL (proficient)
- **Frameworks & Tools:** Flask, Django, Git, TensorFlow
- **Data & ML:** Pandas, NumPy, Matplotlib
- **Systems:** MPI, OpenMP
